

Sustainable Management of Water and Land in Semiarid Areas

Günter Gunkel

José A. Aleixo da Silva

Maria do Carmo Sobral

Editors

Content

Introduction

11

Chapter 1

13

Reservoir as a tool in water quantity management

15

- 1.1. Water Reservoirs: Worldwide distribution, morphometric characteristics and thermal stratification processes
Florian Selge & Günter Gunkel

28

- 1.2. Simulation of hydraulic interaction between Icó-Mandantes bay and São Francisco river, Brazil
Ilhan Özgen, Sandra Seemann, Ana Lúcia Candeias, Hagen Koch, Franz Simons & Reinhard Hinkelmann

Chapter 2

39

Reservoirs biodiversity and aquatic ecosystem Function

41

- 2.1. First approach to retrieve chlorophyll-a using remote sensing techniques in Itaparica reservoir, semiarid of Pernambuco, Brazil
Helio Lopes, Maria do Carmo Sobral, Günter Gunkel, Ana Lúcia Candeias & Gustavo Lira de Melo

60

- 2.2. Phytoplankton diversity and succession in Brazilian and German lakes
Melissa Baptista, Brigitte Nixdorf & Günter Gunkel

79

- 2.3. Carbon cycle and greenhouse gas emissions
Maricela Rodriguez & Peter Casper

99

- 2.4. Carrying capacity of Itaparica reservoir in net cage fish aquaculture
Günter Gunkel, Jan Steemann & Maria do Carmo Sobral

118

- 2.5. Sustainable water purification at Itaparica Reservoir- Closing Water cycles
Stephan Pflugmacher, Ronaldo F. Silva, Michal Zymelka, Peter D. Hansen & Jorge L. A. Silva

Chapter 3

127

Biodiversity and land use in the Caatinga

129

- 3.1. The use of lands from small watershed of Riacho Itacuruba, PE
Sebastião C. de Sousa, Vlândia P. V. de Oliveira, Josefa M. F. da Silva, Rafaela A. de Melo & Raul Azevedo

3.2.	Mathematical modeling of macronutrients uptake contents of two species of the Caatinga in the semiarid of Pernambuco, Brazil <i>José A. Aleixo da Silva, Jadson Coelho de Abreu, Rinaldo L. C. Ferreira & Marilia Regina Costa Castro</i>	144
3.3.	Analysis and uses of shrubs and trees by the Indians in an area of Caatinga in the municipality of Floresta, Itaparica region of Pernambuco, Brazil <i>José S. F. Ferraz, Rinaldo L. C. Ferreira & José A. Aleixo da Silva</i>	165
3.4.	Structure evaluation of the Caatinga vegetation for sustainable forest management in the municipality of Floresta, Pernambuco, Brazil <i>Francisco T. Alves Jr., Rinaldo L. C. Ferreira, R. L. C. Marangon, José A. Aleixo da Silva & Hugo G. C. Gutierrez</i>	186
Chapter 4		
	Socio-economic analysis of the water reservoir and reservoir basin management	203
4.1.	Environmental indicators for irrigation projects: Determining and applying an indicator for the perception of family farming sustainability <i>Renata M. Caminha Carvalho, Maria do Carmo Sobral, José A. Aleixo Silva & Gustavo Lira de Melo</i>	205
4.2.	Multitemporal Analysis of Albedo, NDVI and temperature in the surroundings of Itaparica's reservoir – PE, Brazil: years of 1985 and 2010 <i>Rafaella C. de Moura Matos, Ana Lúcia B. Candeias, José Roberto G. Azevedo, Fred F. Hattermann, Hagen Koch & Birgit Kleinschmit</i>	228
4.3.	Macroeconomic aspects of the micro-regions São Francisco and Itaparica. <i>José Ferreira Irmão, Heinrich Hagel, Reiner Doluschitz, Christa Hoffman, Ana Paula Amazonas & Anderson Flávio</i>	245
4.4.	Driving forces and barriers for a sustainable management of the Itaparica reservoir region - basic milestones towards a constellation analysis <i>Verena Rodorff, Guilherme J. F. de Araújo, Edvânia T. Gomes, Johann Köppel, Marianna Siegmund-Schultze, Maria do Carmo Sobral</i>	265
4.5.	Spatial decision support system for river basin management incorporating hydroeconomic model for optimal water allocation <i>Marcia M. G. Moraes, Bruno E. M. Albuquerque Filho, Carlos A. G. A. Filho & Gerald S. Silva</i>	280

Contato dos Editores

Priv. Doz. Dr. Guenter Gunkel

Technische Universität Berlin

Wasserreinhaltung, Sekr. KF 4, Strasse des 17. Juni 135, 10623 Berlin.
